

## What Does a Scientist Look Like?

This is what image pops into my head . . .

**Purpose:** Students draw their image of a scientist

**Length:** 5 to 7 minutes

**Materials:** Paper and colored pencils or markers for each student

What image pops into students' brains when they hear "scientist"? Ask them to draw that image. Some students may wish to share their drawings.

After you finish the other EarthScape activities, you may wish to revisit this activity to see how students' perceptions of scientists have changed.
