EarthKAM Presentation

Cypress Falls High School
Houston, TX
Remote sensing and the Geographer’s Eye

Astronaut taking a photo from space.
Astronauts on the ‘station’ set up the camera in a special window.
During EarthKam missions students take remote sensing photos of places on Earth such as the Aral Sea
Using a photo you have taken, analyze the image with these questions.

1. Type of shot?
2. Orientation?
3. What patterns/colors do you see?
4. What landforms are recognizable?
5. Names of places?
6. Name of regions/countries in photo?
